DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/28/2006 has been entered.

Response to Arguments

2. Applicant's arguments, see Remarks, filed 9/28/2006, with respect to claims 8-21 have been fully considered and are persuasive. The rejection of claims 8-21 has been withdrawn.

EXAMINER'S AMENDMENT

3. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. E. Russell Tarleton on October 2, 2006.

The application has been amended as follows:

PLEASE CANCEL CLAIM 6.

Allowable Subject Matter

4. Claims 1-5 and 8-21 are allowed. Please note that claims have been renumbered.

5. The following is an Examiner's statement of reasons for allowance:

Independent claim 1 was previously indicated to be allowable wherein, the prior art made of record {GB 2292866 (Miyamoto), USP 6,489,883 (Iiyama et al), USP 6,489,883 (Vercellotti et al)} does not disclose a radio frequency identification transponder having at least an oscillator circuit and a microcontroller and configured to operate in at least one of a plurality of modes of operation and to change modes of operation in accordance with the strength of a received radio frequency signal. The modes of operation comprising at least two of a first mode in which the oscillator circuit operates and the microcontroller does not operate in response to a first strength of the received radio signal, a second mode in which the oscillator circuit and the microcontroller both operate in response to a second strength of the received radio signal, and a third mode in which neither oscillator circuit nor the microcontroller operates in response to a third strength of the received radio frequency signal. Claims 2-5 are dependent on claim 1 and therefore allowable for the same reasons.

Independent claims 8, 11 and 15 recite a variation of the operating modes of claim 1. Claims 9-10 are dependent on claim 8, claims 12-14 are dependent on claim

Art Unit: 2612

11 and claims 16-21 are dependent on claim 15 and therefore allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
